

Exporting from Adobe Audition

Give your track one final listen.

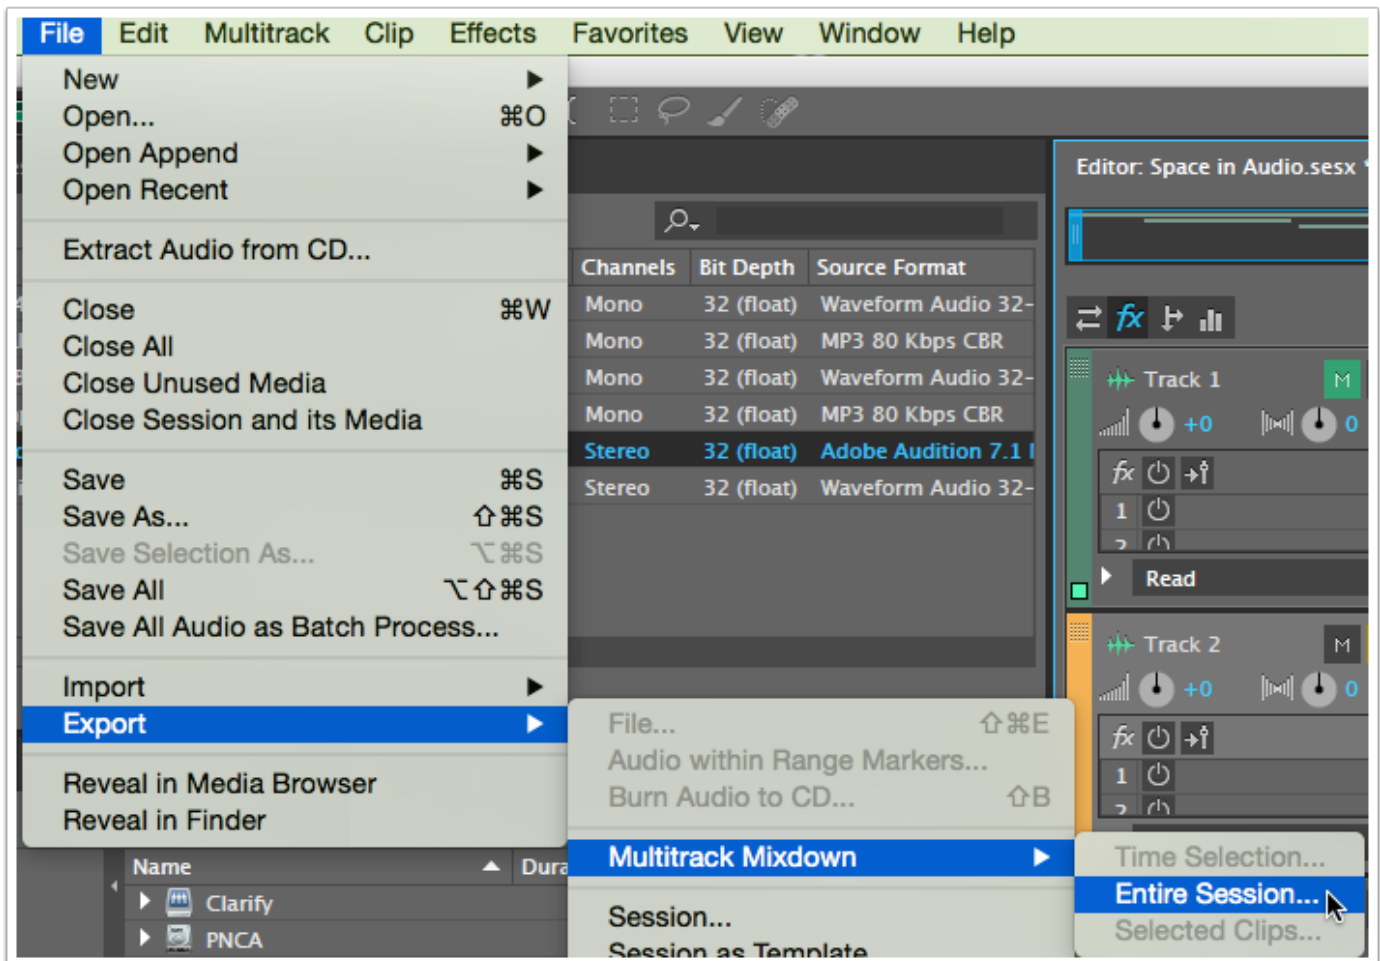

Before you export your text make sure you listen to the entire piece to make sure it sounds right. Look out for accidentally muted or soloed tracks. Also, watch out for any stray clips which might make your piece longer than it actually is.

Exporting from Adobe Audition

Export your Multitrack session.

This can be found under File > Export > Multitrack Mixdown > Entire Session...

Name and save your project

1. Make sure you click the Browse... button.
2. Navigate to the proper folder on your external drive and save your project with the proper naming convention.

Exporting from Adobe Audition

3. Click the 'Save' button, please note the project will not be saved yet.
4. Click the 'OK' button and your .wav file will be exported to the folder you chose in step 2.
